

COVID19 - SAFETY PROCEDURES

IMPLEMENTATION

Implementation of all procedures and safety and hygiene measures required by the Ministry of Health in workplaces.

ADJUSTMENT

Adaptation of workplaces in accordance with all the guidelines of the Ministry of Health.

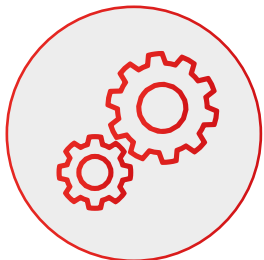

PROVIDE

Providing disinfectants for WSG staff as well as contractors / drivers entering the plant.

RESTRICTION

The application of restrictive ventilation and disinfection principles of rooms in the plant, using surface disinfectants and a modern automatic air ozonation system.

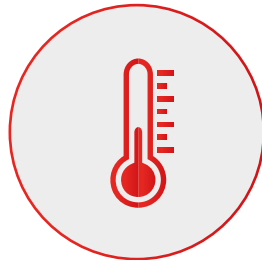

DEVELOPS

Development and implementation of additional internal procedures regulating the organization of work in the plant, procedures for WSG personnel, drivers and office staff.

DISINFECTION

Systematic service and disinfection of work clothes for all factory employees and drivers.

HEAT

Heating of all documents sent to the plant in paper form (80 degrees for 30 min) for disinfection against the virus.

SUPERVISION

Implementation of a supervisory and control procedure to ensure compliance with recommendations and guidelines, ensuring that all safety procedures are followed by WSG personnel.
